## PROJECTS

### Online Food Ordering System:

Developed a user-friendly web application for seamless food ordering and delivery. Integrated real-time menu browsing, cart management, and secure checkout with order tracking. Enabled user authentication, restaurant dashboard, and admin controls for inventory and delivery management. Designed to improve restaurant operations and enhance customer experience through convenient, contactless ordering.

### Health Guardian:

Built a digital health monitoring platform that tracks vital health metrics and offers personalized wellness insights. Integrated user-friendly dashboards, symptom checker, medication reminders, and emergency alert systems. Designed to assist individuals and caregivers in proactive health management by leveraging smart diagnostics and real-time data analytics for early detection and prevention.
